

Why miss a decibel of “It’s so you?”

Siemens iMini™
There's CIC, and then there's
the invisible iMini.

Advanced hearing technology in its tiniest
and most colorful form.

Answers for life.

SIEMENS

For your
ears
only.

The luxe, new Siemens iMini™ lets you express yourself with the ultimate invisible hearing instrument designed just for you. It's fun having such a colorful secret. The impressive iMini is all about handmade quality and cool, even pearlescent shades that let you convey your true self. iMini packs in advanced technology to help you hear your best. **iMini – it's designer fashion for the ears.**

Out of sight.

Engineered to be incredibly small, iMini is prestige craftsmanship in miniature. It's a feat of uncompromising precision that stays unseen.

Every instrument is individually crafted to please. Every time. iMini is the newest, smallest Siemens Custom instrument for people who believe hearing aids should be heard and not seen.

Fitting snugly and inconspicuously in the ear canal with no external components, you'll forget iMini is even there. It's that comfortable. With feedback-free sound, it's the totally discreet way to not miss a decibel of the next compliment headed your way.

Each iMini is one of a kind, giving you the perfect answer for every kind of customer.

Made to measure.

Your iMini is as unique as you are. From initial consultation to fine tuning and finishing, you're completely involved in the creation of your iMini hearing aids.

Craftmanship is the hallmark of all luxury products. And iMini is no different. Handcrafted iMini is where excellent technology meets art. Down to the last detail.

Each distinctive, polished iMini is a masterpiece with miniature, precision-engineered components. And every individual hearing aid comes with a certificate signed by the artist who built it, a reflection of Siemens workmanship, skill, and pride.

Tiny in size. Big in sound. iMini.

Equipped with BestSound™ Technology, iMini delivers exceptional sound quality.

To make sure iMini stays confidential, it's equipped with FeedbackStopper™, which stops feedback better than any other system on the market. FeedbackStopper acts within milliseconds to prevent annoying whistling or feedback before it starts.

iMini's SoundSmoothing® suppresses sudden, disturbing noise such as breaking glass or dishes clanking together. And iMini's Speech and Noise Management automatically reduces background noise while isolating and enhancing speech you need to hear.

Devoted to precision.

iMini's miniature components are optimally positioned with the help of computer-aided design. Next, iMini is meticulously assembled, shaped, and finished by hand.

- 1 Siemens iScan™ is a 3D scanning process that ensures the excellent quality and fit of each iMini.
- 2 Our skilled technicians use sophisticated software to determine the smallest possible packing density, and thus the tiniest size.
- 3 The final polish ensures that iMini is smooth to the touch and comfortable on the ears.

Colorfully ingenious.

With 12 color choices, create a customized iMini that's all your own. Make a statement with a special jewel tone that reflects who you are. If you love winter, you might choose Shimmering Pearl. Or maybe you'll choose Irish Emerald for luck. Choose a color that makes you feel good because that's what iMini is all about.

Shimmering Pearl

Purely Platinum

Hot Pink Diamond

Bold Citrine

Sunset Amber

Sunrise Gold

Irish Emerald

Polished Malachite

Deep Amethyst

Midnight Sapphire

Ruby Red

Regal Walnut

Your Audiologist or Hearing Care Provider:

Hearing instruments help many people hear better, but no hearing instrument can solve every hearing problem nor restore normal hearing.
